## Building Update

As most everyone knows, demolition of the old station began on Monday, October 4, 2010. In roughly one week, the old station was torn down, the site was cleaned up, and the remains have been hauled away. All the steel for the building has arrived and is located in the borough building parking lot. Site prep and foundation work has begun on the site. You can find a timeline pictorial on the back side of this newsletter.
